tutman.

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Veritas Equity Strategy Class A GBP

A sub Fund of the TM Veritas Investment ICVC

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation): GB00BNV0F828 ISIN (Income): GB00BNV0FG02

Objectives and Investment Policy

The Fund aims to achieve a total return (through a combination of capital growth and income), net of fees, in excess of the OECD G7 Consumer Price Index plus 5% per annum, over five-year rolling periods. Capital invested in the Fund is at risk and there is no guarantee that the investment objective of the Fund will be achieved over that five-year rolling period, or any time period.

The Fund will aim to achieve the investment objective by investing directly in a focused portfolio of between 25 and 40 global issuers, representing an allocation to equities of between 80-100% of the Scheme Property in normal market conditions. The Fund may also invest in other transferable securities, alternatives i.e., infrastructure and commodities (which will be held indirectly via permitted investments such as collective investment vehicles), bonds (including corporate bonds and government and public securities), warrants, money market instruments, deposits and cash or near cash investments. The Fund may hold units in other collective investment schemes (including those managed or operated by the ACD and/or advised or managed by the Investment Manager, or an associate of the ACD or Investment Manager), but these will be limited to a maximum of 10% of the total value of the Scheme Property. Fixed income and/or cash may be used tactically at the Investment Manager's discretion. The investment policy of the Fund may mean that at times, where it is considered appropriate, the Scheme Property will not be fully invested and that prudent levels of liquidity will be maintained in order to reduce risk and preserve capital. The Fund will hold cash and cash equivalents to maintain liquidity. The Investment Manager may make use of derivatives where considered prudent for Efficient Portfolio Management (including hedging) although the use of derivatives is expected to be limited. The Investment Manager will actively manage the Fund. This means the Investment Manager actively makes decisions about how to invest the Scheme Property of the Fund (and which investments to buy and sell) instead of simply following a market index.

The OECD G7 Consumer Price Index combines the inflation rates for the inter-governmental forum known as the G7. This group consists of Canada, France, Germany, Italy, Japan, the United Kingdom and the United States. This rate has been chosen as a target for the Fund's return because the Fund aims to grow investments above the rate of inflation as seen in the major countries in which it invests, over the longer term.

The Fund also uses two comparator benchmarks:

(a) Market comparator – The Fund uses the MSCI World Index as a comparator benchmark as against the wider equities markets and an investor may choose to use this benchmark to compare the returns achieved by the Fund against the performance of the assets in which the Fund can invest. This comparator benchmark has been chosen taking account of the investment strategy of the Fund and the assets in which the Fund invests. The MSCI World Index is a benchmark that captures large and mid-cap companies publicly listed across 23 developed markets. MSCI define developed market countries as: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US.

(b) Peer group comparator – The Fund also uses the Investment Association Global peer group as a performance comparator which is a peer group which groups funds with a similar objective of investing at least 80% of their assets globally in equities. An investor may choose to use this peer group to compare the returns achieved by the Fund against other funds with a similar objective.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 22:30pm.

Risk and Reward Profile

The risk rating of the Fund is category 6 due to the volatility of simulated data which sits in a range of between 15% and 25%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.75%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The UCITS annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

There is insufficient historical data to provide a useful indication of past performance for the the TM Veritas Equity Strategy Class A GBP.
